

 sw.js

```
1  function register(){
2      navigator.serviceWorker.register('sw.js');
3      alert("done!\nyou'll now get update notifications\n\nalso help I have no idea how to
do backends");
4  }
5
6  function swUpdate(input) {
7      Notification.requestPermission(function(result) {
8          if (result === 'granted') {
9              navigator.serviceWorker.ready.then(function(registration) {
10                 registration.showNotification('Update:', {
11                     body: input,
12                     vibrate: [200, 100, 200, 100, 200, 100, 200],
13                     tag: 'update'
14                 });
15             });
16         }
17     });
18 }
```
